- 2D film fabrication techniques (PVD, ALD, etc.)

Lernziele und Kompetenzen:

The students are capable ...

- to explain the fundamental chemical and physical properties of nano-scale materials
- to distinguish and to compare some properties, structure and applications of different nanomaterials
- to describe and to evaluate the major concepts in supramolecular chemistry, molecular self-assembly and nano-scaled 2D materials and transfer knowledge to related topics
- to judge on potential nano-analytical tools with optimized image contrast
