
Modulbezeichnung: **Convex Optimization in Communications and Signal Processing (ConvOpt)** **5 ECTS**
 (Convex Optimization in Communications and Signal Processing)

Modulverantwortliche/r: Wolfgang Gerstacker
 Lehrende: Wolfgang Gerstacker

Startsemester: WS 2020/2021	Dauer: 1 Semester	Turnus: jährlich (WS)
Präsenzzeit: 60 Std.	Eigenstudium: 90 Std.	Sprache: Englisch

Lehrveranstaltungen:

Convex Optimization in Communications and Signal Processing (WS 2020/2021, Vorlesung, 3 SWS, Wolfgang Gerstacker)
 Tutorial for Convex Optimization in Communications and Signal Processing (WS 2020/2021, Übung, 1 SWS, Adela Vagollari)

Empfohlene Voraussetzungen:

Signals and Systems, Communications

Inhalt:

Convex optimization problems are a special class of mathematical problems which arise in a variety of practical applications. In this course we focus on the theory of convex optimization, corresponding algorithms, and applications in communications and signal processing (e.g. statistical estimation, allocation of resources in communications networks, and filter design). Special attention is paid to recognizing and formulating convex optimization problems and their efficient solution. The course is based on the textbook "Convex Optimization" by Boyd and Vandenberghe and includes a tutorial in which many examples and exercises are discussed.

Lernziele und Kompetenzen:

Students

- characterize convex sets and functions,
- recognize, describe and classify convex optimization problems,
- determine the solution of convex optimization problems via the dual function and the KKT conditions,
- apply numerical algorithms in order to solve convex optimization problems,
- apply methods of convex optimization to different problems in communications and signal processing

Verwendbarkeit des Moduls / Einpassung in den Musterstudienplan:

Das Modul ist im Kontext der folgenden Studienfächer/Vertiefungsrichtungen verwendbar:

[1] Berufspädagogik Technik (Master of Education)

(Po-Vers. 2020w | TechFak | Berufspädagogik Technik (Master of Education) | Gesamtkonto | Wahlpflichtmodule Fachwissenschaft | Convex Optimization in Communications and Signal Processing)

Dieses Modul ist daneben auch in den Studienfächern "123#67#H", "Advanced Signal Processing & Communications Engineering (Master of Science)", "Berufspädagogik Technik (Bachelor of Science)", "Communications and Multimedia Engineering (Master of Science)", "Computational Engineering (Master of Science)", "Computational Engineering (Rechnergestütztes Ingenieurwesen) (Master of Science)", "Elektrotechnik, Elektronik und Informationstechnik (Bachelor of Science)", "Elektrotechnik, Elektronik und Informationstechnik (Master of Science)", "Information and Communication Technology (Master of Science)", "Informations- und Kommunikationstechnik (Master of Science)", "Medizintechnik (Master of Science)", "Wirtschaftsingenieurwesen (Bachelor of Science)", "Wirtschaftsingenieurwesen (Master of Science)" verwendbar.

Studien-/Prüfungsleistungen:

Convex Optimization in Communications and Signal Processing (Prüfungsnummer: 68501)

(englische Bezeichnung: Convex Optimization in Communications and Signal Processing)

Prüfungsleistung, Klausur, Dauer (in Minuten): 90

Anteil an der Berechnung der Modulnote: 100%

Erstablesung: WS 2020/2021, 1. Wdh.: SS 2021

1. Prüfer: Wolfgang Gerstacker
